- Hidden Metal Key Override

Proposed Network Layout

CONFIDENTIAL. THIS IS A BELINE DOCUMENT.

Real Time “On The Fly” Features

- Edit & Delete Access Rights
- Obtain Entry Logs
- Override Lock & Unlock
- Optional “In The Room” Motion Sensor

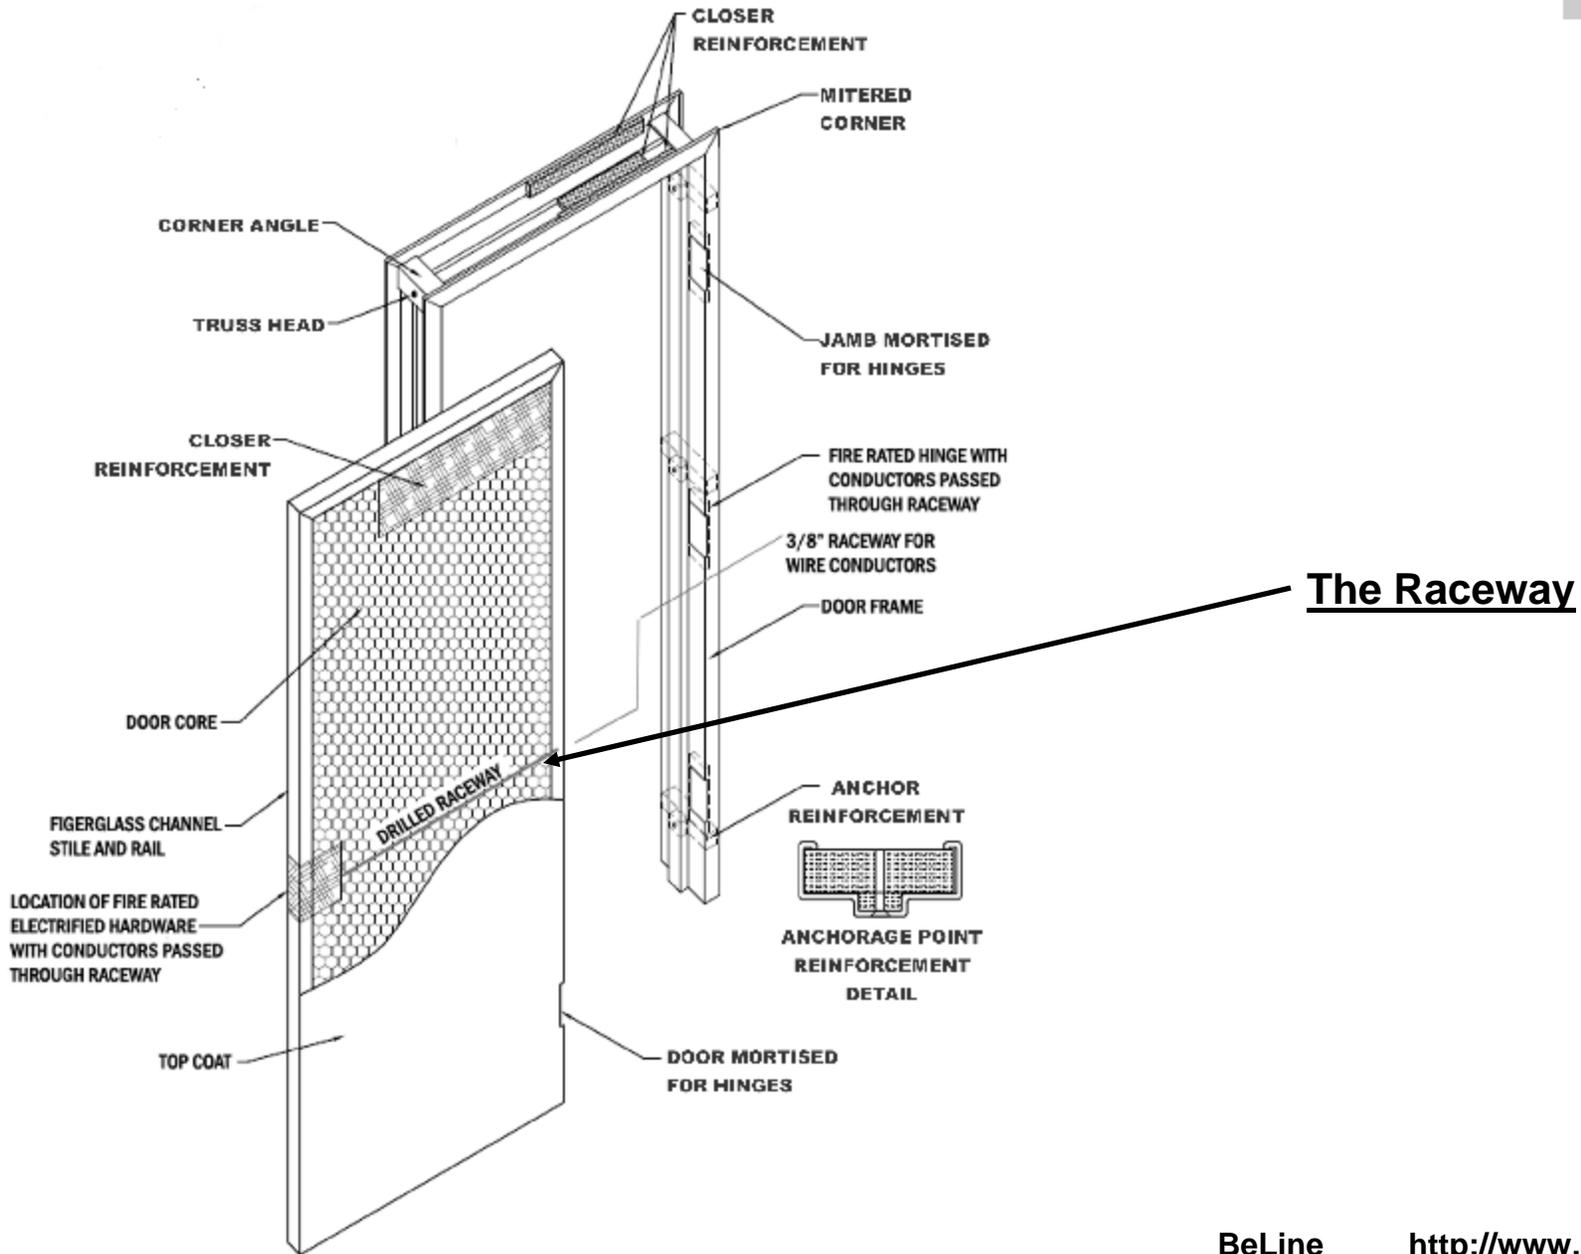

Certified Raceway

A Raceway is the long straight hole drilled from the hinge side of the door to the side where the door lock is located. This channel is used to run voltage carrying wire to the lock for communications and power. On a fire rated door, the Raceway cannot be drilled by just anybody. To maintain the fire rating of the door and the Raceway drilled on site, a certified technician must perform this work. BeLine has subcontracted certified Raceway Installers to perform this work.

AHJ's (Authorities Having Jurisdiction) perform the inspections for your doors to verify that the fire rating is still valid. AHJ's recognize the work performed by a certified Raceway Installer whereby making the entire inspection process many factors easier because the Raceway installation is an approved process.

The Raceway

Complete Package by BeLine

- Hardware with Full Functionality
- Nationwide Installation Services
- Certified Service Recognized by AHJ's
- BeLine Manufacturer Direct
- Great Cost Great Value
