THE INTEGRATION OF BUSINESS AND TECHNOLOGY

ELECTRONIC LOCK SOLUTIONS

FOR YOUR BUSINESS

Beline provides smart solutions for your business. Maintaining the most up to date technology, BeLine designs user friendly, hassle free products. Let BeLine handle your product needs, so you can concentrate on your core business. Reliability, coupled with the most comprehensive warranty policy amongst our competition, your search for an electronic lock solution ends right here.

"Finally, an affordable system you can trust."

BeLine Software Solution

BeLine's management software runs on any Windows based PC. The management software provides a user friendly screen that provides the most commonly used commands. Issuing a card couldn't be much easier than this. Every card issued expires according to your specified date and time. Card usage can be tracked to increase accountability and deter property loss. BeLine's management software is perfect for the hospitality industry and ideal for commercial business buildings.

BeLine's unique design by using a Windows based PC reduces downtime, if any. The use of a Windows PC eliminates the risk of having only one card programmer on the property. BeLine's software comes with unlimited licensing, meaning that the USB card programmer provided can be used on other PC's. Replacing a programmer is as simple as plugging in another USB card programmer.

Technological Expertise
In Designing Solutions
For Your Business

BeLine's goal is to provide product designs that exceed performance standards in any environment and application. We understand the need for reliability and cost effectiveness. All of BeLine's solutions are technologically advanced and are produced cost effectively, which translates into savings to the consumer.

BeLine products implement reliable integrated circuits that withstand all weather conditions. BeLine doorlocks are constructed with two layers of metal, the outer layer of the doorlock is stainless steel for guaranteed rust free surfaces. BeLine doorlocks utilize commercial grade mortises that are standard in size to assure the availability of spare parts even after its product lifecycle. The mechanical design is superior in quality and is very easy to service.

Trust in BeLine when it comes to choosing doorlock solutions for you business.

SERVICE & SUPPORT

BeLine's service is always provided first class, just the way you expect it. BeLine employs a fleet of installers across the continental United States and Hawaii. Support from BeLine is provided all around the clock and we guarantee the same day response even if you call after normal business hours. Approved dealership branches located outside the United States are in Canada and South America.

"We Don't Just Develop Electronic Doorlock Solutions, We Support Them Throughout Their Lifecycle."

BeLine supports products throughout their lifecycle. BeLine products are designed with the consumer in mind. Spare parts and support are readily available. With interchangeable parts from other BeLine products you're guaranteed parts and repair services for your product for as long as you own them.

CardLock 1100

The CardLock 1100 smartcard doorlock is BeLine's most popular selling doorlock. A step above magnetic stripe technology, this smartcard doorlock is a perfect choice when upgrading from a magnetic stripe doorlock system. This system is great for those purchasing an electronic cardlock system for the first time. When used with BeLine's multi-technology cards, the CardLock 1100 can also work seamlessly with other vendor systems.

Ideal for: Lodging, campuses, business buildings, hospitals, financial institutions, applications using HID's prox reader, Keri System's prox reader or similar.

PRICE:$_____   EXPIRES:_____

CardLock 1000

The CardLock 1000 is BeLine's answer to providing traditional legacy technology. The CardLock 1000 utilizes the same full brushed stainless steel body as the CardLock 1100 and the RF 1500 to guarantee a rust free surface. The CardLock 1000 is popular with those who need to integrate a doorock system with POS (point of sale) or similar systems. This lock is great when multiple systems are required to operate from one card.

Ideal for: Lodging, multiple systems using magnetic stripe, applications using HID's prox reader, Keri System's prox reader or similar.

PRICE:$_____   EXPIRES:_____

PART# RF 1500

This is BeLine's most advanced doorlock. The RF 1500 is technology without the price tag. Hold the card over the sensor and your in! It's as simple as that. Since this lock is not an insert style, there are no sensitive read heads to clean. The RF 1500 is sealed so less contaminants enter the lock. Simply speaking, this lock is easy to use, maintenance free and its design is attractive. The RF 1500 is tried-and-true when used with access control prox readers. When combined with access control, you'll only need one card.

Ideal for: Lodging, campuses, commercial buildings, hospitals, financial institutions, applications using HID's prox reader, Keri System's prox reader or similar.

CardLock Programmer

The CardLock Programmer is a USB device that operates on any PC. Each programmer is issued a unique property ID to maintain security. When used with the CardLock Management Software this programmer issues administrator cardkeys and doorlock configuration cardkeys for smooth system administration. The use of administrator cardkeys eliminates hassles of connecting complicated hand held devices to the doorlock. Procedures that were once complicated are now effortless.

CardLock Management Software

The Cardlock Management software runs on Windows. The beauty of this software design allows the database and configuration to be backed up at anytime and restored on any PC running Windows. For those in Lodging who are overhauling from low tech to high tech, there's a complementary room rate calculator system included in the software. This will help jump start your move in the right direction. For those who are already in Lodging or property managers, the management software offers an easy to use card issuing system with special features such as audit trail tracking for loss prevention.

INCLUDED WITH USB CARD PROGRAMMER.

Other cylinder keyways available (must be specified before ordering)	✔	

You may be wondering what distinguishes our door lock from other vendor's door locks. Listed here are some main points you should know:

1. A computer based programmer – A computer is included with the purchase of your programmer. Typically, card programmers are hand held. Those programmers must sent back to the factory for upgrades or repairs. If you don't have a back up programmer you will not be able to make cards to check in guests. The BeLine system is a simple USB design that is made to plug and play on any computer that is running our software. USB is a stable technology and is very rare that a programmer fails. If the computer fails, all you need to do is just install the software onto another computer and plug in the USB card programmer. You will be up and running again within 20 minutes.

2. Easy to service parts – The internal design of the BeLine system is basic yet very affective and reliable. If you are new to electronic door locks, one installation will make you an expert. BeLine limits the amount of components in the design to make things simple for maintenance or repair.

3. Long lasting batteries – The supplied batteries by BeLine is proven to last 18+ months with average entrances. There are only 4 AA batteries in the BeLine design.

4. Stainless Steel Body – The body of the BeLine design is all stainless steel. This means that there will be no rust. Other vendor's have painted bodies. Once scratched, the lock will start to rust.

5. Coated electronics – All the electronics inside the BeLine door lock are coated with high temperature silicon. The silicon will protect the circuitry from moisture, cold and heat.

6. Card slot door- In the BeLine design of the card reader inside the lock, there is a small door that opens and closes. This door protects the card reader head from getting dirty or wet. Although the reader is made to operate in extreme conditions, the small door protecting the reader will extend the component lifetime.

7. Spare parts and repair of out of warranty locks– BeLine has been selling this lock for many years now. This lock will continue to sell for many years down the line and spare parts and repair service will continue to be available.
